## **WHO WE ARE**

**Our mission** is to bring children and families together to create, learn, play, and explore without boundaries.

**Our vision** is to expand possibilities for children; building a brighter future for our community.

**We are a world-class children's museum.** In June 2019, we opened our doors at our new home in the historic Mendel Building, located on the banks of the South Saskatchewan River. Since opening we have brought thousands of visitors together in a rich educational environment that fosters learning through experiences rooted in play.

Our interactive exhibits and engaging programs provide creative and educational experiences for children and families. A walk through the museum reveals a flowing space that is comfortable, exciting, and welcoming to all people. From the ethereal northern lights that grace the heights of the facility's main gallery to the fan-favourite, whimsical fiber-art climbing structure, you'll discover nooks for high-energy activity and crannies for quiet, thoughtful creation and play. Our exhibits provide endless opportunities to explore the wonderful ways science, technology, engineering, art, and math interact. The museum draws visitors from across the province, and beyond, and is integral to the cultural fabric of Saskatchewan.
